

REPLACEMENT SHEET

ABSTRACT

This metal housing (2) is particularly intended to contain electronic or similar components. It includes a side wall (8) furnished with a ledge (20) having a bore (16) to receive a fixing screw (6). The side wall (8) has, at the bore (16), a recessed zone (10) whose concavity is oriented toward the outside of the housing (2), the ledge (20) intended to receive the screw (6) overhanging the recessed zone (10).
